Dashboard Analysis

Market Leader — United States: The US accounts for 65.07% of total profit and represents the dominant revenue market at over $2M in sales — more than double all other markets combined.

Second Tier — Canada: Canada contributes 27.3% of profit, making it the strongest secondary market worth strategic investment for market expansion campaigns.

Emerging Markets: France, United Kingdom, Australia, and Germany collectively account for just ~7.5% of profit, revealing significant untapped growth potential across European and Pacific markets.

Low Profit Margin Alert: A 1.31% profit margin on $3.51M revenue signals extremely thin margins. The $70 spread between average selling price ($534.35) and average cost ($527.37) demands immediate cost optimization or pricing strategy review.

Strategic Business Decisions

1. Retain & Grow US Market: Protect market share with loyalty programs, premium product lines, and targeted marketing in the US. It is the profit engine.

2. Invest in Canada: Allocate additional sales and marketing budget to Canada. With 27.3% profit share, a 10% sales uplift could yield significant ROI.

3. European Expansion Strategy: Conduct feasibility studies for France, UK, and Germany. Consider appointing dedicated regional managers or distribution partners.

4. Margin Improvement Plan: Implement cost reduction strategies — negotiate supplier contracts, optimize supply chain logistics, and review product pricing architecture to lift margins above 5%.

5. Profit Margin KPI Target: Set a company-wide KPI goal to achieve 3–5% net profit margin within 12 months through pricing power and cost discipline.

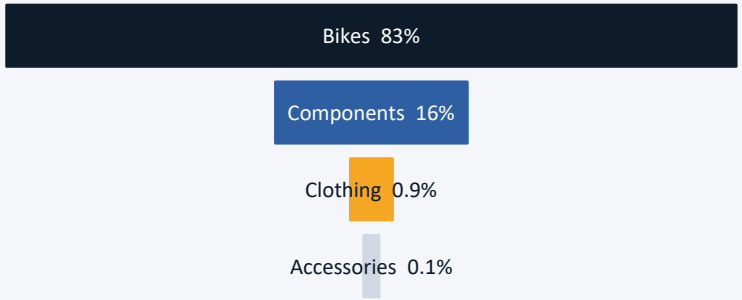
Analysis — Product Category Performance Dashboard

Analysis & Business Insights

Category	Total Sales	Profit Share	Status
Bikes	$2.91M	**83.28%**	*Top Performer*
Components	$0.56M	**12.10%**	*Strong Support*
Clothing	$0.03M	**4.62%**	*Growth Needed*
Accessories	$0.01M	**~0.02%**	*Underdeveloped*

Funnel Chart Insight — Sales by Category



Analysis

Bikes dominate with 83.28% of all profits — the company is effectively a bicycle business with accessories as minor revenue streams. The Components segment at 12.1% provides meaningful support, likely driven by bike maintenance needs. Clothing at 4.62% and Accessories under 1% represent underdeveloped categories with uncharted revenue potential.

The funnel chart confirms a steep sales cascade, highlighting over-reliance on a single category. This concentration risk demands portfolio diversification efforts.

Strategic Business Decisions

1. Double Down on Bikes: Expand premium bike product lines (e-bikes, performance, urban). The 83% share justifies R&D investment.

2. Component Bundle Strategy: Create bike + component packages to lift average order value and drive component revenue above 20%.

3. Revitalize Clothing & Accessories: Launch branded cycling apparel campaigns and accessories lines. Target a combined 10% revenue share within 18 months.

4. Reduce Category Risk: Set a strategic goal of no single category exceeding 70% within 3 years, improving portfolio resilience.

Product-Level Analysis

The individual product performance dashboard empowers granular, drill-down analysis across 397 products segmented into 4 categories. The slicer functionality enables targeted product comparisons — critical for identifying top-sellers vs. underperformers.

Bikes generate $2.91M (83%) of $3.51M total revenue, cementing their role as the company's primary revenue driver. The enormous gap between Bikes and other categories means any inventory shortfall or supply disruption in bikes would be catastrophic to company revenue.

The $7,066 Accessories total across the entire product portfolio signals either poor product-market fit or insufficient marketing investment in this segment.

Strategic Business Decisions

1. Conduct SKU Rationalization: Use the product slicer to identify bottom 20% products by revenue. Discontinue or reposition underperformers to reduce inventory costs.

2. Accessories Revenue Drive: Launch a targeted accessories upsell program at point-of-sale (e.g., 'Complete Your Ride' bundles). Target $50K in accessories within 6 months.

3. Top Product Protection: Identify the top 10 best-selling bike models and ensure uninterrupted inventory supply with safety stock targets and supplier SLAs.

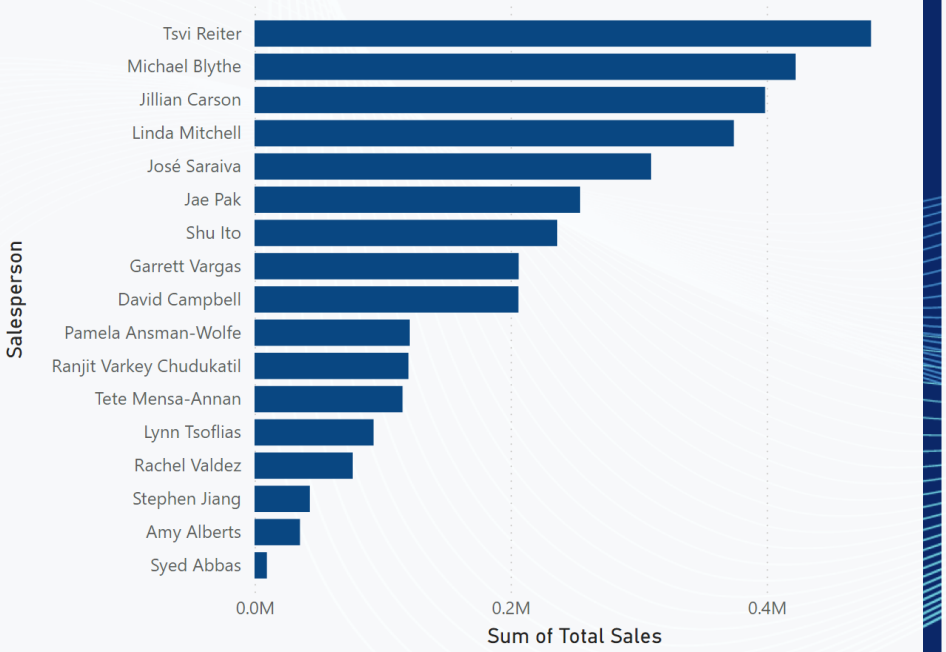
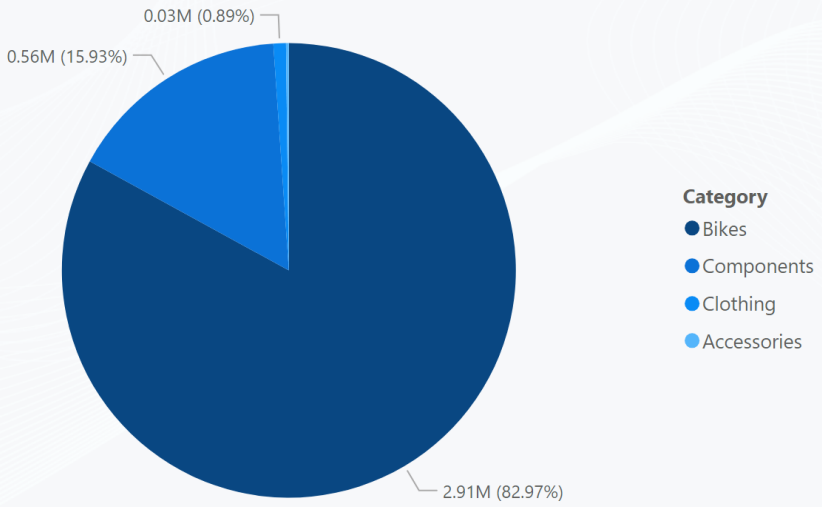
Garrett Vargas	Jae Pak	Jillian Carson
José Saraiva	Linda Mitchell	Lynn Tsoflias

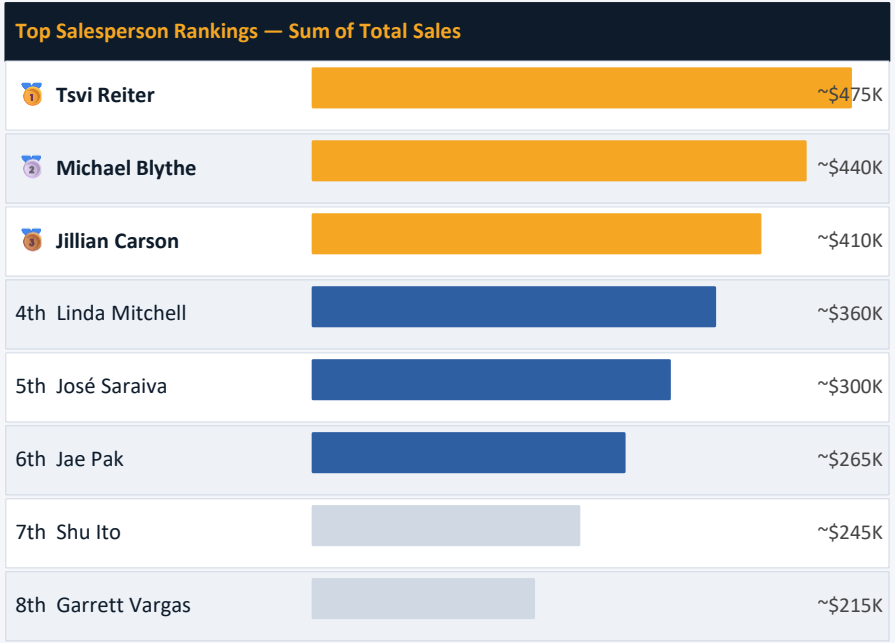
Sum of Total Sales by Salesperson



Sum of Total Sales by Category



Analysis — Sales Performance by Salesperson



⚠ Bottom performers: Syed Abbas, Amy Alberts, Stephen Jiang & Rachel Valdez each recorded <$100K in sales — flagging performance coaching needs or territory imbalances.

📊 Salesperson Analysis

The sales team of 18 representatives shows a notable performance disparity. The top 3 performers (Tsvi Reiter, Michael Blythe, Jillian Carson) collectively drive approximately 40% of total company revenue — a classic 80/20 distribution pattern.

Product category mix shows 82.97% of all sales come from Bikes, with Components at 15.93%, reaffirming the overall portfolio concentration story.

The 9-person lower-tier (below $200K individually) represents an opportunity for training, territory reallocation, or performance management interventions.

💡 Strategic Business Decisions

1. Incentivize Top Performers: Create a tiered commission structure rewarding the top 3-5 salespeople. Implement a 'Sales Champion' recognition program to retain key talent.
2. Performance Coaching Program: Assign mentors from top performers to the bottom 5 reps. Set quarterly improvement milestones with structured coaching sessions.
3. Territory Rebalancing: Audit sales territory assignments. Bottom performers may be handling under-resourced or saturated territories — realign for equitable opportunity.
4. Team Sales KPI Dashboard: Provide each salesperson a personal KPI view in Power BI for real-time performance tracking and accountability.

Various Professional Analytics Titles for Your Dashboard Cards

TITLES GIVEN TO SALES VALUE

Total Sales

Gross Revenue

Total Revenue Generated

WHY THIS TITLE?

However, Gross Revenue stands out. In analytics, 'Gross Revenue' is the industry standard term for total sales amount before deductions. Signals financial sophistication.

TITLES GIVEN TO PROFIT VALUE

Total Profit

Net Profit / Net Income

Operating Profit

WHY THIS TITLE?

However, for the sake of the Project, we may prefer to refer to it as 'Net Profit', which is universally recognized and communicates bottom-line performance. Use 'Operating Profit' if EBITDA adjustments are excluded.

TITLES GIVEN TO COST VALUE

Total Cost

Cost of Goods Sold (COGS)

Total Operating Cost

WHY THIS TITLE?

'COGS' is a standard financial term representing direct costs. This positions the metric within a proper P&L framework for stakeholders.
